

# EONS-8 Scientific Programme

## Thursday 26 April 2012

### Opening & Plenary I Lecture

08:30 - 09:30

Salle 2

#### **Welcome Message**

Chair: B. Grube (Denmark)

Co-Chair: S. Kav (Turkey)

#### **Personalized Cancer Care – Is it Achievable?**

Speaker: J. Corner (United Kingdom)

### Parallel Session: Early Detection, Screening and Prevention

09:35 - 11:00

Salle 3

Chair: S. Bunskoek (The Netherlands)

**Objective:** Increase the professional awareness of how screening and early detection for lung and cervical cancer can be improved and how many professionals can be incorporated in this task. It is important to understand the available tools that we have now to greatly reduce the burden of these cancers.

#### 09:40 **Screening and early detection of lung cancer**

Speaker: R. Ziengs (The Netherlands)

#### 10:10 **Changing the concept of cervical cancer screening in Europe - The example of HPV DNA introduction**

Speaker: S. SanJosé (Spain)

#### 10:40 **Questions & Answers**

## Parallel Session: Advances in Genomics and Personalised Medicine: Implications for Cancer Care

09:35 - 11:00

Salle 4

Chair: S. Kav (Turkey)

**Content:** The study of genetics and genomics is increasingly considered an essential science for all areas of health care, requiring skill in risk assessment, genetic testing, diagnosis, targeted prevention strategies, pharmaco-genomics, and genetic therapies. This session will introduce nurses to the field of genetics, genomics and its impact on cancer care and nursing practice. Learning objectives: - Describe the difference between "genetics" and "genomics" - Describe how genomics research is integrated into practice and care - Explore the ways to communicate genomic information

09:35 **Genomics and personalized medicine**

Speaker: G. Pichert (UK)

10:00 **How genomics will change our practice?**

Speaker: P. Rieger Trahan (USA)

10:25 **Communication of genomics information**

Speaker: A. Murphy (Switzerland)

10:50 **Questions & Answers**

## Parallel Session: Management of Skin Cancer and Skin Problems

09:35 - 11:00

Salle 15

Chair: B. Grube (Denmark)

09:40 **New developments in the systemic treatment of melanoma**

Speaker: Sandra Andriaansz (The Netherlands)

10:10 **Impact and management of malignant wounds**

Speaker: B. Lund-Nielsen (Denmark)

10:40 **Questions & Answers**

## Workshop: Symptom Management

09:35 – 11:00

Salle 18

Chair: P.M. Fernandez-Ortega (Spain)

**Symptom management – Let's do it evidence based**

Discussant: Anita Margulies (Switzerland)

**Complex pain management - case examples**

Discussant: I. Garcia Salvador (Spain)

**Discussion**

## Parallel Session: Involving and Empowering Patients

11:30 - 13:00

Salle 3

- 
- Chair: M. Wells (United Kingdom)
- 11:35 **Patient reported outcomes**  
Speaker: M. Wells (United Kingdom)
- 12:00 **Patient involvement in cancer care: a matter of choice?**  
Speaker: V. Entwistle (United Kingdom)
- 12:25 **Internet-based support for patients with cancer**  
Speaker: C. Ruland (Norway)
- 10:50 **Questions & Answers**

## Parallel Session: Joint EONS-SIOPE Session: Survivorship and Long-Term Follow-Up in Teenagers and Young Adults

11:30 - 13:00

Salle 15

- 
- Chair: D. Kelly (United Kingdom)
- 11:35 **Assessing late effects in young cancer survivors**  
Speaker: D. Greenfield (United Kingdom)
- 12:00 **Developing new support services for young people with cancer**  
Speaker: D. Kelly (United Kingdom)
- 12:25 **Title to be announced**  
Speaker: *to be announced*
- 12:50 **Questions & Answers**

## Workshop: EONS/ECPC/ISNCC Joint Discussion Forum: How to Reach Disadvantages Group

11:30 - 13:00

Salle 18

- 
- Chair: Birgitte Grube (Denmark)
- EONS**  
Discussant: S. Kav (Turkey)
- ECPC**  
Discussant: S. Ene (Belgium)
- ISNCC**  
Discussant: G. Cummings (Canada)

## Parallel Session: Critical Care / Emergency Admissions

16:00 - 17:30

Salle 3

Chair: Dr. S. Dolan (United Kingdom)

- 16:00 **Step by step: emergency admission for neutropenia sepsis**  
Speaker: Y. Schneider (Israel)
- 16:30 **Emergency response in outpatient oncology care: role of rapid response teams**  
Speaker: S. Dolan (United Kingdom)
- 17:00 **Questions and Answers**

## Parallel Session: Psychosocial Issues

16:00 - 17:30

Salle 15

Chair: P.M. Fernandez-Ortega (Spain)

- 16:05 **Psychosocial problems and needs of patients with cancer and their relatives**  
Speaker: *to be announced*
- 16:30 **Psychosocial cancer rehabilitation**  
Speaker: L. Dietrich (Switzerland)
- 16:55 **Managing social difficulties: assessment, support and intervention**  
Speaker: Dr Jane Hopkinson, Southampton University (UK)
- 17:20 **Questions & Answers**

## Workshop: Facilitating Smoking Cessation

16:00 - 17:30

Salle 18

Coordinator: C. Martínez (Spain)

Coordinator: R. Ziengs (The Netherlands)

### Introduction

Tobacco use kills more than 5 million people worldwide per year and 650.000 of them are passive smokers. Tobacco use is associated with a variety of cancers including cancers of the lung, oral pharynx and larynx, esophagus, bladder, kidney, pancreas, and cervix, among other.

Smoking is an issue for many patients at the time of cancer diagnosis and treatment. Continued smoking after a cancer diagnosis is associated with decreased survival, increased risk of recurrence, increased risk of secondary tobacco-related cancers, and increased postoperative morbidity as well as increased side effects of chemotherapy and radiation therapy. For the increasing number of cancer survivors, cessation may become an important part of health promotion and rehabilitation.

Despite this knowledge, tobacco control remains poorly implemented within the health care services in many countries. This is surprising particularly as sustained evidence-base programs are known to reduce smoking rates, tobacco-related deaths and disease caused by tobacco use.

### Purpose

The workshop purpose is to present the tobacco cessation tools and strategies that can be implemented effectively in all health care settings and within different legislative frameworks. It does this by promoting a comprehensive tobacco control policy within health care organization that curbs tobacco use and obtains health gain outcomes. Moreover, this session wants to involve cancer nurses in tobacco cessation, to prevent tobacco-related morbidity and mortality.

### Learning objectives:

- Learn about the relation between smoking and illness/cancer
- Learn about the rules and regulations about smoking in Europe.
- Know which tools can be used to help patients to quit smoking
- Learn how to assess the smoker and provide support to quitting.

### Key points for discussion with workshop participants

- How the tobacco cessation can be implemented effectively in all healthcare settings and within different legislative frameworks.
- Discussion will engage participants in exploring the elements of a comprehensive tobacco control programs. These include: implementation of tobacco-free policies, the promotion and provision of tobacco cessation, staff training and education and the inclusion of initiatives to prevent initiation.
- Provide examples of how to assist patients in the daily care?

## Welcome Reception

17:30 - 18:30

---

## Networking Party

20:00

---

# Friday 27 April 2012

## EONS General Meeting & Networking Breakfast

08:00 - 09:30

Salle 2

---

## Parallel Session: Joint EONS/ONS Session: Management of Cancer Services

09:35 - 11:00

Salle 3

---

Chair: F. Charnay-Sonnek (France)

09:35 **New ways of the management of the cancer services**  
Speaker: *to be announced*

10:00 **Managing knowledge transfer**  
Speaker: F. Charnay-Sonnek (France)

10:25 **Leading and management in nursing**  
Speaker: M.F. Gullatte (USA)

10:50 **Questions & Answers**

## Parallel Session: Advances in Genomics and Personalised Medicine: Implications for Cancer Care

09:35 - 11:00

Salle 4

---

Chair: S. Kav (Turkey)

**Content:** The study of genetics and genomics is increasingly considered an essential science for all areas of health care, requiring skill in risk assessment, genetic testing, diagnosis, targeted prevention strategies, pharmaco-genomics, and genetic therapies. This session will introduce nurses to the field of genetics, genomics and its impact on cancer care and nursing practice. Learning objectives: - Describe the difference between "genetics" and "genomics" - Describe how genomics research is integrated into practice and care - Explore the ways to communicate genomic information

09:35 **Genomics and personalized medicine**  
Speaker: G. Pichert (UK)

10:00 **How genomics will change our practice?**  
Speaker: P. Rieger Trahan (USA)

10:25 **Communication of genomics information**  
Speaker: A. Murphy (Switzerland)

10:50 **Questions & Answers**

## Workshop: Symptom Management

09:35 – 11:00

Salle 18

---

Chair: P.M. Fernandez-Ortega (Spain)

**Symptom management – Let's do it evidence based**

Discussant: Anita Margulies (Switzerland)

**Complex pain management - case examples**

Discussant: I. Garcia Salvador (Spain)

**Discussion**

## Parallel Session: Colon Cancers, Liver Metastasis and Ovarian Cancers

14:00 - 15:30

Salle 3

---

Chair: P.M. Fernandez-Ortega (Spain)

14:10 **Colon cancers and new developments in treatment of liver metastasis**

Speaker: I. Schoenaker (The Netherlands)

14:40 **Ovarian cancers**

Speaker: A. Lechner (The Netherlands)

15:10 **Questions & Answers**

## Parallel Session: Nutrition and Cancer

14:00 - 15:30

Salle 4

---

Chair: T. Ferro (Spain)

14:00 **Patients and families affected by cancer cachexia syndrome: problems and solutions**

Speaker: J.B. Hopkinson (United Kingdom)

14:25 **The need for nutritional screening in oncology**

Speaker: L. Arribas (Spain)

14:50 **The evidence-based nutritional support in the oncologic patient**

Speaker: F. Bozzetti (Italy)

15:15 **Questions & Answers**

## Workshop: Complex Cases

Last update: 04/10/2011

14:00 - 15:30

Salle 18

---

Coordinator: S. Kav (Turkey)

Discussant: M. Wells (United Kingdom)

Discussant: A. Margulies (Switzerland)

Discussant: S. Bunskoek (The Netherlands)

## Plenary II Lecture & Farewell Message

15:30 - 17:00

Salle 2

---

Chair: B. Grube (Denmark)

**How can we improve the cancer service by collaboration between nurses and patients?**

Speaker: S. Ene (Belgium)

**Farewell Message**
