Nomination Form EONS Board

I hereby confirm my intention to stand as a nominated candidate for election to the EONS Board of the European Oncology Nursing Society (EONS).

1. NOMINEE'S NAME: Remziye Semerci

2. NOMINATION FOR ROLE OF:

(select one option only)

- ☐ EONS President-Elect
☐ EONS Board Member Education
☒ **EONS Board Member Research**

3. ELIGIBILITY:

(complete one section only)

I am an EONS Individual Member.

My membership number is: 1227

My nominating person is: Bilal Awad

The position/role of the nominating person is: (Position: EONS, CWG Member)

I am an EONS Individual Member.

My membership number is: 918

My nominating person is: Eugenia Trigos

The position/role of the nominating person is: (Position: EONS, EWG Member)

EONS Board Member Research

EONS OR

I am a member of an EONS National Cancer Nursing Society.

The name of the Society is:

My nominating person is:

The position/role of the nominating person is:

4. AIMS:

In this section you should describe your motivation to become a member of the EONS Board, what you hope to achieve if you were elected as well as indicate the skills, networks of people and experience that you would be able to bring. Remember to link your aims directly to EONS activities.

This text will be used during the election procedure.

I would like to become an EONS Board Member because:

I am interested in becoming an EONS Board Member because my extensive background in pediatric oncology nursing and active involvement in national and international oncology nursing societies put me in a position to contribute effectively to the EONS Board. I am a member of the Turkish Pediatric Oncology Group, Turkish Oncology Nursing Society, a steering member of the SIOP, and a member of the SIOP-E, ECO, and MASCC.

I am interested in becoming an EONS Board Member-at-Large for Research because of my deep commitment to advancing oncology nursing research and my long-standing involvement in EONS working groups. Since 2019, I have been actively engaged in multiple EONS initiatives, including the Young Cancer Nurse Group, Communication Working Group, Scientific Program, ECND, and ECCN Working Groups, where I have contributed to various projects and research efforts in collaboration with the EONS team. This experience has given me a strong foundation in research leadership, collaboration, and strategic planning, aligning with EONS's mission to drive excellence in oncology nursing through evidence-based practice.

Throughout my career, I have led and participated in numerous national and international research projects, focusing on improving symptom management, enhancing the quality of life for cancer patients, and integrating innovative, technology-based interventions into oncology nursing. My involvement in EONS-driven research initiatives has reinforced my belief in the power of collaboration to generate meaningful evidence and translate findings into real-world clinical applications. I am passionate about mentoring oncology nurses in research, supporting their engagement in scholarly activities, and ensuring that EONS continues to be a leader in nursing-led research across Europe.

If elected, I will work towards expanding research opportunities, strengthening cross-border collaborations, and advocating for evidence-based policy changes that elevate the role of oncology nursing in patient care. My dedication, experience, and strong international network make me a committed candidate for this role, and I look forward to contributing to the EONS Board's mission of advancing cancer nursing research across Europe.

My aims during my term on the Board of EONS would be (300 words max):

My primary goal would be to strengthen nursing-led research and expand access to research opportunities for oncology nurses across Europe, particularly those from low- and middle-income countries. My extensive experience in international oncology nursing societies, including the Turkish Pediatric Oncology Group, Turkish Oncology Nursing Society, SIOP, SIOP-E, ECO, and MASCC, has reinforced my belief that collaborative efforts between EONS and these organizations can enhance research capacity and support oncology nurses in their professional development. One of my main objectives is to increase research literacy and capacity-building among oncology nurses, particularly in underrepresented regions. I aim to develop mentorship programs, research workshops, and funding guidance initiatives to support nurses in designing, conducting, and publishing research. By fostering a strong research culture, we can ensure that nursing-led studies contribute meaningfully to patient care, symptom management, and survivorship outcomes. I also aim to strengthen collaboration between EONS and other international oncology organizations, facilitating joint research projects, knowledge exchange, and advocacy for increased funding in cancer nursing research. These partnerships will help advance evidence-based nursing practices and ensure that nurses play an integral role in shaping cancer care policies. Additionally, I will work towards improving the dissemination and application of research findings by developing strategies to integrate research into clinical guidelines, educational programs, and policy discussions. Ensuring that oncology nurses have access to the latest evidence-based practices is critical for improving patient outcomes and strengthening the impact of nursing in cancer care. By focusing on equity, collaboration, and sustainability, I am committed to advancing research within EONS, supporting nurses in their academic endeavors, and driving innovation in oncology nursing across Europe.

The skills and experience that I would be able to bring to the role are (800 words max): My extensive experience in oncology nursing research, leadership in international oncology organizations, and mentorship in research capacity-building uniquely position me to contribute effectively as the EONS Board Member-at-Large for Research. With a strong background in pediatric oncology nursing and cancer survivorship research, I have led and collaborated on multiple national and international projects to improve symptom management, survivorship care, and technology-enhanced interventions in oncology nursing.

As an Associate Professor in Pediatric Oncology Nursing, I have been actively engaged in clinical research, methodological studies, and implementation science, ensuring that oncology nursing research translates into real-world clinical applications. I have conducted systematic reviews, randomized controlled trials, qualitative studies, and psychometric validation studies, contributing to developing nursing-led, evidence-based interventions in pediatric and adult oncology care.

In addition to publishing in high-impact peer-reviewed journals, I am an Associate Editor for the European Journal of Oncology Nursing. In this role, I oversee manuscript reviews, support the dissemination of oncology nursing research, and ensure the integration of high-quality evidence into practice. My editorial experience allows me to contribute strategically to EONS's research priorities, critical appraisal, and research dissemination efforts.

My involvement in international research initiatives is reflected in my role as a steering member of the SIOP and my membership in SIOP Europe, the ECO, and the MASCC. These affiliations have allowed me to collaborate with leading oncology researchers, secure funding for innovative projects, and advocate for oncology nursing research internationally. Furthermore, I am actively involved in EONS initiatives, having contributed to the Young Cancer Nurse Group, Communication Working Group, Scientific Program, ECND, and ECCN Working Groups since 2019. My extensive participation in EONS projects has equipped me with the skills to lead and oversee research working groups, ensuring that research priorities align with EONS's strategic goals.

One of my key priorities is to empower nurses, particularly those from low- and middle-income countries, to develop their research skills and engage in evidence-based practice. I have mentored early-career oncology nurses and researchers, providing guidance on study design, grant writing, academic writing, and publication strategies. Through my leadership in research education initiatives, I have successfully organized workshops, training sessions, and mentorship programs to build research capacity in oncology nursing.

As a principal investigator and researcher in multiple funded projects, I have developed expertise in securing grants, managing projects, and translating research findings into clinical practice. My ability to advocate for research funding and guide oncology nurses in obtaining research support would be a valuable asset to EONS in expanding its research initiatives.

Much of my work involves advocating for the recognition and funding of nursing-led research. I have actively contributed to policy discussions on cancer nursing research priorities, the role of oncology nurses in survivorship care, and the integration of technology-driven interventions into nursing practice. EONS can be pivotal in securing greater research funding, promoting interdisciplinary research collaborations, and increasing the visibility of oncology nursing research.

To promote international research partnerships and foster stronger collaborations between EONS and global oncology nursing organizations (e.g., SIOP, ECO, MASCC, and national oncology societies). Develop initiatives to support nurses from low- and middle-income countries in building research skills and securing funding for nursing-led studies. Expand research dissemination efforts, ensuring that oncology nurses access high-quality, evidence-based resources influencing patient care. Advocate for the inclusion of nursing-led research in European cancer policy agendas, reinforcing the impact of oncology nursing on patient outcomes.

With my strong background in oncology nursing research, leadership in international oncology organizations, expertise in academic publishing, and dedication to research mentorship, I am confident I can make a significant impact as an EONS Board Member-at-Large for Research. My commitment to elevating oncology nursing research, expanding research opportunities for nurses across Europe, and strengthening collaboration between EONS and global oncology stakeholders will contribute to advancing nursing science and improving cancer care worldwide.

EUROPEAN ONCOLOGY NURSING SOCIETY

Nomination Form EONS Board

I hereby confirm my intention to stand as a nominated candidate for election to the EONS Board of the European Oncology Nursing Society (EONS).

1. NOMINEE'S NAME: Kristina Stošić

2. NOMINATION FOR ROLE OF:

(select one option only)

☐ EONS President-Elect

☐ EONS Board member Education

☒ **EONS Board Member Research**

3. ELIGIBILITY:

(complete one section only)

I am an EONS Individual Member.

My membership number is:

My nominating person is:

The position / role of the nominating person is:

OR

I am a member of an EONS National Cancer Nursing Society.

The name of the Society is: Society of Nurses in Oncology of Serbia

My nominating person is: Mrs Mirjana Gavrilovic

The position / role of the nominating person is:

Head nurse of Institute for Oncology and Radiology of Serbia

03/02/2025

4. AIMS:

In this section you should describe your motivation to become a member of the EONS Board, what you hope to achieve if you were elected as well as indicate the skills, networks of people and experience that you would be able to bring. Remember to link your aims directly to EONS activities.

This text will be used during the election procedure.

I would like to become an EONS Board Member because (600 words max):

Dear Sirs,

I would like to express my interest in becoming a member of EONS. During my ten-year career while working at the Institute of Oncology and Radiology of Serbia, I have always tried to learn from the best representatives of our profession, and the Institute is certainly a core of excellent, dedicated nurses. After completing my basic vocational studies, I enrolled first in specialist and then master's vocational studies, which I graduated from in 2022, which is just a confirmation that I am ready for continuous professional development and learning both in theory and in practice. I am very interested in exchanging experiences and ideas with colleagues from other countries so that we can all improve our extremely important profession together.

My aims during my term on the Board of EONS would be (300 words max):

My aims during my term on the Board of EONS are to exchange experiences, knowledge and ideas with nurses in other European countries, hoping that we will work together to improve the position of our profession, and especially nurses working in oncological care.

The skills and experience that I would be able to bring to the role are (800 words max):

I have ten years of experience working at the Clinic for Internal Medicine Oncology of the Institute of Oncology and Radiology of Serbia. I have experience in working with oncology patients of different disease localisations, so I am familiar with numerous therapeutic protocols and specifics of care for this vulnerable patient population. In addition to completing basic vocational studies, I also completed specialist vocational studies in the field of clinical care, and then master's vocational studies. I take an active part in my work as a lecturer at the congresses that are organised every year in our country.

5. EXPERIENCE & SKILLS

A short bio (one page A4 maximum) with passport size photograph must be included with this application to consider it complete. Please include your present professional role and *titles* (RN, PhD, MSc, other, if applicable). **If the bio and photograph are not provided, the nomination will be ineligible and will not be considered.**

EUROPEAN ONCOLOGY NURSING SOCIETY

Nomination Form EONS Board

I hereby confirm my intention to stand as a nominated candidate for election to the EONS Board of the European Oncology Nursing Society (EONS).

1. NOMINEE'S NAME:

Aydanur AYDIN

2. NOMINATION FOR ROLE OF:

(select one option only)

- ☐ EONS President-Elect
- ☐ EONS Board member Education
- ☒ EONS Board Member Research

3. ELIGIBILITY:

(complete one section only)

I am an EONS Individual Member.

My membership number is:

My nominating person is:

The position / role of the nominating person is:

OR

I am a member of an EONS National Cancer Nursing Society.

The name of the Society is: **Oncology Nursing Society in Türkiye**

My nominating person is: **Aydanur AYDIN**

The position / role of the nominating person is: **President-Elect in Breast Cancer Group**

4. AIMS:

In this section you should describe your motivation to become a member of the EONS Board, what you hope to achieve if you were elected as well as indicate the skills, networks of people and experience that you would be able to bring. Remember to link your aims directly to EONS activities.

This text will be used during the election procedure.

I would like to become an EONS Board Member because (600 words max):

I have been working in the Oncology Nursing Association breast group for over 10 years. I previously served as the group's secretary and continued this duty until this year. This year, I am serving as the group's vice president. I have made it my mission to complete all the duties I have undertaken on time and completely.

My aims during my term on the Board of EONS would be (300 words max):

Up until now, I have undertaken the management of various activities for awareness training and awareness events in the breast group. My goal is to organize mass events worldwide between October 1-31 and to contribute to awareness.

The skills and experience that I would be able to bring to the role are (800 words max):

With this role, providing benefits to society can be considered as the primary goal. This multi-stakeholder institution has an effective history in defining different roles and it is clear. In this direction, it may be possible to establish new interactions and develop projects that will provide great contributions with collaborations. I also work as an associate professor in an institution. My research area is breast cancer patients. I have experienced carrying out different awareness projects in this direction before. Expanding the new generation technologies I have experienced to a platform that will provide benefit worldwide can be considered as the secondary goal with this role.

5. EXPERIENCE & SKILLS

A short bio (one page A4 maximum) with passport size photograph must be included with this application to consider it complete. Please include your present professional role and *titles* (RN, PhD, MSc, other, if applicable). **If the bio and photograph are not provided, the nomination will be ineligible and will not be considered.**
